

DOD approved alternate authentication for telework, mobile/BYOD, & non CAC eligible users

DOD authentication challenges

High cost and complexity of CAC infrastructure for teleworkers

Lack of strong authentication for non CAC eligible workers

Lack of strong authentication for non GFE (Mobile, BYOD)

Strong authentication from Yubico:

- Purpose-built for security
- No network connection, stored data, or client software required
- Highly phishing resistant

YubiKeys bring portability, compatibility, and usability to PIV and CAC

FIPS 140-2 validated

Hardware security key that supports PIV/CAC & modern strong credentialing without peripheral devices

DOD approved MFA token

For unclassified & secret classified information systems and applications

Supports derived credentials

Approved as mobile authenticator for issuance of DoD Mobile PKI credentials. Supports DISA Purebred derived credentials

Authority to operate at DOD

Over 150 unique implementations

Strong authentication. Easy user experience.

Efficient delivery.
