

## Product Line Overview

Vellicom Tactical's line of ruggedized displays, electronics, and accessories is engineered to support mobile command and control applications in the harshest environments. Whether your customer needs to rapidly acquire an off the shelf AV system, or develop a custom product for a specific mission, Vellicom Tactical will work with you to win their business.

### Tactical Displays

Tactical Displays make it possible to rapidly share information and enhance situational awareness in a command and control environment. Vellicom Tactical's 4K ultra high-resolution displays are available in a variety of configurations.

- Flat panel displays, short throw projectors, and video walls
- Power lift and manual deployment mechanisms
- Displays sizes ranging from 60in to 200in
- Mil-Spec aluminum and ABS transport cases

### Deployable Electronics

Vellicom Tactical's ruggedized electronic systems simplify audio and video input management in the field and enable state-of-the-art video teleconferencing. Offerings include:

- Audio and video distribution units
- Multiview and videowall image processors
- Video teleconferencing centers

### Operations Accessories

Provide your customers with a complete TOC or command center solution including heavy duty furnishings and other mission specific components.

- PA Systems
- Tactical tables
- Folding chairs
- Cable management
