Q&A HOW NASA SEWP SIMPLIFIES THE FEDERAL **ICT** PROCUREMENT PROCESS

NASASEWP
Solutions for Enterprise-Wide Procurement

What is NASA SEWP?

NASA SEWP is a Government-Wide Acquisition Contract (GWAC) providing federal agencies with a pre-competed, multiple-award, indefinite delivery, indefinite quantity (IDIQ) contract for Information and Communications Technology (ICT) products and services. SEWP makes the ICT procurement process practically effortless. SEWP has vetted, negotiated prices, and set upfront terms and conditions with 140+ pre-competed Prime Contract Holders.

What does that mean for me?

SEWP provides savings, convenience, and a great selection of vendors to help federal agencies meet their business goals. SEWP's upfront work allows federal agencies to get lower prices on ICT purchases rather than going to the open market or using other contract vehicles, saving you time and money. Federal procurement personnel can easily use SEWP's online Quote Request Tool (QRT) to submit requests and watch vendors compete for your business.
Who can use SEWP?

Contracting and procurement personnel at all federal agencies, along with their approved support service contractors, can use SEWP. We're easy to find: **www.sewp.nasa.gov**. Get started!

How does SEWP differ from other GWACs?

Most notably, SEWP's premier customer care approach sets us apart. Our entire staff understands that service is the key to customer satisfaction and is dedicated to responding to customers immediately. Just send an e-mail to **help@sewp.nasa.gov**!

Can all of my ICT needs be met through SEWP?

Yes, SEWP can meet your needs for all products and services within scope. SEWP provides the latest in commercial ICT products, services, and solutions. We help you obtain mission-critical, innovative ICT products and product-based solutions for individual, site, or agency-wide requirements. We don't have a traditional catalog; ours counts more than 5 million products, and it expands based on your needs. Getting what you need is always easy with SEWP.
