

*Engineered and built for challenging deployment operations
 where quality and dependability are absolutely required.*

Video Teleconferencing System (VTCS)

Turnkey system ships in two heavy-duty transport cases with pre-integrated, shock-mounted codec in molded, dust and waterproof poly utility case.

Outstanding Features:

- Convenient front access for all system inputs and outputs.
- Precision TAA Compliant Cisco HD 1080p camera compatible with Webex and other standards.
- Multiple camera mounting systems
- Two high-performance 2-way powered speakers with heavy-duty stands (not shown).

Critical electronics secured in rugged, dust and waterproof case

Accessories case includes touch screen panel, camera, optional tripod adapter mount, power and connections cables, omni-directional mic, antennas, support instructions and full color QuickStart Guide.

Cisco 10" touch screen control screen simplifies connection and communication, combining smart design with intuitive user interaction features such as customizable home screen buttons. A tactile mute button is instantly available on screen frame.
