

Department of Defense Data Strategy

The DoD now recognizes that **data is a strategic asset that must be operationalized** in order to provide a lethal and effective Joint Force that combined with our network of allies and partners, sustains American influence and advances shared security and prosperity.

David L. Norquist, Deputy Secretary of Defense

Varonis at the Center of The DoD Data Strategy Framework

Protection for your most valuable data

- Data-centric Zero Trust security model
- End-to-end visibility and control of how data is accessed and shared
- UEBA to detect threats in partnership with organization data ethics
- Least-privilege model of access to data
- Threat models utilizing A.I. and machine learning
- Federal Policy Pack to assist in out-of-the-box regulatory and cybersecurity policy compliance

- Vision Statement
- Essential Capabilities
- Guiding Principles
- Goals
