

Zoom for Government

Data Sheet

Zoom for Government: Designed for the Federal Mission

As part of the normal course of business, U.S. Federal Government employees need to collaborate online while safeguarding crucial information and mitigating risk. In order to address federal requirements, Zoom has a separate, U.S.-based platform designed to support the U.S. Federal Government's FedRAMP Moderate security requirements, called Zoom for Government.

While designed to comply with the stringent requirements of the Federal Government, Zoom for Government delivers an intuitive and secure experience similar to what commercial Zoom users experience.

Zoom is for your mission

It's more than just meetings! The Zoom for Government platform extends beyond Zoom Meetings and Chat to Zoom Video Webinars, Zoom Rooms, and Zoom Phone.

- + Zoom is an American company, founded and based in San Jose, California.
- + The Zoom for Government platform uses U.S.-based AWS GovCloud infrastructure and U.S.-based co-located data centers.
- + Zoom for Government achieved FedRAMP Moderate authorization in early 2019 and retains such authorization today.
- + Zoom Meetings on the Zoom for Government platform received Authorization to Operate with Conditions (ATO-C) for Department of Defense (DoD) Impact Level 4 (IL4) from our service sponsor: Department of the Air Force. This ATO-C permits, with conditions, the use of Zoom for Government Zoom Meetings at Impact Level 4 throughout the Department of the Air Force. Currently, Zoom Phone and Zoom Rooms are authorized at the IL2 level.
- + Zoom for Government supports FIPS 140-2 cryptography 300+ NIST controls, and has a HIPAA attestation.

Spotlight: Zoom Phone: Enabling the Federal WFX (Work from Anywhere) Vision

Zoom Phone is the cloud PBX solution built for the Zoom platform. It can replace your existing phone system and work seamlessly with video meetings and chat on the Zoom for Government platform. HD voice delivers high quality audio to all Zoom Phone endpoints.

Zoom Phone helps you deliver a consistent, quality experience to all your users. The solution enables IT teams to simplify day-to-day telephony operations and management and shift their focus to strategic tasks. We make support easy: your IT organization won't have to worry about being familiar with PBX management, as the Zoom Administrator experience is designed to be user-friendly and intuitive.

Zoom Phone on the Zoom for Government platform is authorized at the DoD IL2 and FedRAMP Moderate levels.

Spotlight: Zoom Rooms: Empowering the Hybrid Office

Zoom Rooms is a software-based room system that leverages hardware appliances, kits, or customizable components to create an easy-to-use experience.

- For end users, Zoom Rooms makes it easy to book rooms, start meetings, and share content.
- For IT teams, Zoom Rooms is part of a single collaboration stack that's simple to purchase, deploy, and manage, all while enhancing user adoption and IT success.

Zoom Rooms on the Zoom for Government platform is authorized at the DoD IL2 and FedRAMP Moderate levels.

Exclusively for government:

Zoom for Government is available exclusively for the U.S. Federal Government, U.S. state and local governments, and any approved contractors that support their mission.
