

# Security Intelligence to Disrupt Adversaries

## Overview

Using a combination of analytics and human expertise, Recorded Future produces [elite security intelligence that disrupts adversaries at scale](#). By fusing the broadest variety of open source, dark web, and technical sources, with original research we deliver the most relevant intelligence in real time. [The Recorded Future Security Intelligence Platform](#) aggregates this rich intelligence with any other data sources you use. This empowers security teams to collaborate on analysis and deliver intelligence wherever they need it most — including rapid integration with your existing security tools and solutions.

## Precision Security Intelligence Solutions

Everything you need to reduce risk fast — without any of the noise. Recorded Future delivers elite security intelligence via six distinct modules. Each module is tailored to maximize efficiencies across your teams, processes, workflows, and existing security investments.

“

Recorded Future empowers teams with accurate, actionable intelligence when there's something to report that presents real risk. And just as important, it's silent when there's nothing to report."

-Espen Johansen, Director of Product Security, Visma

### BRAND INTELLIGENCE:

Protect your brand from external threats:

- Domain abuse detection
- Data leakage monitoring
- Brand attack mitigation
- Monitoring for threats to your industry

### SECOPS INTELLIGENCE:

Accelerate threat detection, investigation, and response:

- Alert triage
- Threat detection
- Threat prevention

### THREAT INTELLIGENCE:

Access the world's largest commercial threat research platform:

- Advanced threat research and reporting
- Advanced detection and validation
- Dark web investigation

### VULNERABILITY INTELLIGENCE:

Prioritize the vulnerabilities that matter at scale:

- Vulnerability prioritization
- Monitoring for vulnerabilities in your tech stack

### THIRD-PARTY INTELLIGENCE:

Gain continuous visibility on your third parties :

- Continuous third-party risk management
- Procurement assessment

### GEOPOLITICAL INTELLIGENCE:

Monitor and protect against global physical threats:

- Location-based monitoring

## Feature Comparison

Recorded Future is a modular security intelligence solution designed for customization to meet each client's unique needs. Our six modules enable you to interact with the world's most advanced security intelligence platform in the exact ways that are right for your organization — without any of the noise.

|                                                                                                                        | Brand Intelligence | SecOps Intelligence | Threat Intelligence |
|------------------------------------------------------------------------------------------------------------------------|--------------------|---------------------|---------------------|
| Intelligence on IPs, Domains, and URLs                                                                                 | Yes                | Yes                 | Yes                 |
| Intelligence on Hashes and Malware                                                                                     | Preview Only       | Yes                 | Yes                 |
